

# As Scientists, our big question is... What do different parts of plants and animals do?

## REMEMBERING Prior Learning

I can name a variety of animals and plants.

I can explain some things that are needed by plants and animals.

I can recognise some animals eat meat, some animals eat plants and some eat both.

## UNDERSTANDING Sticky Knowledge

Can I identify and name a range of plants and animals?

Can I explain how different parts of plants and animals function?

Can I describe, draw and label the structure of common animals and plants?

## APPLYING

## My Aspirations

A zoologist studies living things and how they behave.

## Vocabulary

Species	Carnivore	Herbivore	Omnivore	Evergreen/Deciduous	Anatomy
A group of animals that can reproduce with each other.	An animal that only eats meat.	An animal that only eats plants.	An animal that eats both plants and meat.	A plant that keeps/loses its leaves when the seasons change.	The different parts of a plant or animal.
